Additional Information

Replaces the current X6

Information

For premium enjoyment of black coffee specialties

The X4 offers incomparable coffee enjoyment. It grinds the coffee beans with the Professional Aroma Grinder (P.A.G.2) and combines three innovative JURA brewing processes. With the One-Touch Lungo function, it prepares aromatic americanos and lungos with their characteristic notes to perfection. The popular café crème benefits from 3D brewing technology, while espressi boast a strong yet balanced taste thanks to the Pulse Extraction process (P.E.P.®). The X4 is based on a user-centric concept and offers stylish functionality. It supports the MDB standard, providing a flexible payment connection. It also impresses with ergonomically designed components, as well as a lockable bean container and water tank. The X4 offers coffee aficionados simple, intuitive operation and, most importantly, outstanding coffee indulgence. It is ideal for caterers, self-service areas and open-plan offices where about 100 cups are prepared per day.

Outstanding coffee quality

The modern Professional Aroma Grinder (P.A.G.2) promises the perfect grind and ensures the complexity of aromas found in every coffee variety and roast makes its way into the cup. The grinder remains in rest mode between preparations, which is gentler on the grinder while increasing its service life. Three different brewing processes ensure a perfect result, automatically lending the desired coffee speciality its specific character at the touch of a button.

Complete usability

The X4 impresses with twice the professionalism, meeting the needs of both operators and coffee drinkers in equal measure. With a 3.5-inch display and six preset buttons, it ensures practical access to a whole world of indulgence. In operational terms, its configuration and locking options are very impressive. Thanks to the lockable water tank and bean container, it is protected against external interference while its ergonomically designed components, such as the drip tray and coffee grounds container, offer easy everyday use.

Timeless professional look

With its Dark Inox colour and straight lines, the X4 reflects the classic JURA design. It is a genuine eye-catcher and is just as stylish in a design-savvy environment as on a caterer's counter. The X4 design strikes a perfect balance between aesthetics and functionality.

Supports modern payment methods

The X4 supports the MDB standard and enables connection to numerous payment systems. Connected to the JURA MDB Interface 2.0, the X4 offers maximum flexibility be it for credit cards, badge or mobile payment. The JURA Pocket Pilot 2.0 is also a convincing solution. The free software combines contactless payment with a billing and management system in a single, web-based tool.

Benefits

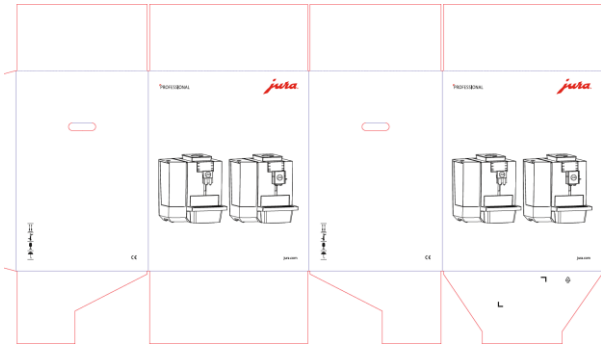

- Professional Aroma Grinder for outstanding coffee quality.
- 3.5-inch colour display with buttons on the front, ensuring simple and intuitive operation.
- Classic JURA design with straight lines and Dark Inox colour.
- Supports modern payment connection options such as the MDB standard and Pocket Pilot 2.0.
